IAHPC Final Statement Public Hearing WHO Scoping Document Children's Pain

I am Dr. Katherine Pettus, Advocacy Officer for the International Association for Hospice and Palliative Care a global membership organization of palliative care experts and a non-state actor in official relations with WHO. This statement concerns population and intervention in the Scoping Document. We request it includes concrete attention to support for the clinical, psycho-social and financial needs of informal caregivers, mostly women and girls. Only a few countries in the world provide this sort of support, which should be universal. Our members on the Guidelines Committee will promote this among other scoping concerns.
